Postdoctoral job opportunity in Polymer Science (Bioplastics/Biopolymers or Biomaterials)
One Year @ University of Strasbourg / France

Description of the postdoctoral position:
BioTeam (http://www.biodeg.NET) is a well-known and international research group (Team Leader: Prof. Luc Avérous), at the research Institute ICPEES (UMR CNRS 7515), University of Strasbourg - France (#16 - Top World University Ranking for chemistry), established in experimental approaches focused to systems based on biodegradable and/or biobased polymers, for environmental or biomedical applications. (Lab location: http://biopol.unistra.fr/venue/)

This postdoctoral position is not associated with a specific project.
Before to start, the postdoc must define his own research subject on agreement with (i) his/her background and (ii) the topics of the BioTeam (given @ http://ww.biodeg.net)

Starting date: Now (asap)

Duration: one year (potential renewable period of one year)

Salary: 2,000 € neat/month including the French social insurance.

Requirements:
- Knowledge in polymer science and polymer engineering,
- Must possess a PhD degree and a good experience on Research,
- Previous publication activity in journals having high impact factor (IF),
- Fluency in written and spoken English.

- Responsibilities and expected outputs:
- To conduct and develop his own research subject,
- Potential supervision of a PhD Student and young fellows,
- Publication of results in journals having high impact factor,
- Presentations of the results during BioTeam’s meetings ...

The successful applicant is expected to be an enthusiastic and self-motivated person with strong intellect who is able to take a creative approach to scientific tasks. He/She has the skills necessary to be independent researcher in the respective areas of specialization. The ability to lead and communicative personality are strong advantages.

To apply:
The application must include: (i) candidate’s detailed CV, (ii) letters of intent, (iii) list of publications, (iv) copies of degrees/certificates and (v) a proposal of a research project written in 1-2 pages.
